

in Town, I may be more fortunate -
at least your company will be an
additional chance of meeting him -

Mr Charles
Mrs. Harris -

DSI

Summer Torrington Square
19th June 1844

Dear Sir,

Both your kind letters have
reached their destination, and they
have very sincerely to thank you for
your obliging, and immediate answer
to my request - We came here yesterday
from Malton Place, on our way
to Wales, & the North of England, where
we propose to spend the next three
or four weeks, & to return to Kent
about the middle of July - As soon
as he returns home Mr. & Mrs. will

ect to work again on your very
valuable proofs - to her especially so -
and I have no doubt, by awaiting herself
of your kind instructions, she will succeed
to her wishes - I am very little in
town, living almost entirely with
my excellent son in law, and
daughter, at their beautiful seat
in Kent - but whenever I am here,
it will give me very sincere pleasure
(or not consider there as word of
course) to see you - I think you have
a son just home, or going to Christ's
Hospital - If I can at any time be

of use to him, I shall have great
pleasure in being so, - and if he
will call here, I shall be glad to
see him - Believe me

Dear Sir
Yours obliged
& faithful Servant
John Jos Childs

I am rejoiced to hear so good an
account of Mr. Ware's box - I have
not seen or heard from Mr. John
Henshel lately - I was in some hope
of his company here, with Mr. Baily
& a few other friends, the last time I
was staying in town, but he was not
able to come up - Perhaps when you are

CHILDREN, JOHN GEO. (1777-1852) Scientist, published Notes
on Electricity.

FLETCHER-58

A.L.S. to an unnamed correspondent.

4pp. 4to. Torrington Square: June 19th. 1844. £1/15/-

A good letter, thanking his friend for his immediate answer to his own request & promising that Mrs. Atkins should set to work on "your valuable proofs". And saying that he lived with his daughter in Kent, offering to help his friend's son who was going to Christ's Hospital & hoping that they could meet in town with Sir John Herschel and Mr. Baily.
